

# ResourceWise<sup>®</sup> WoodMarket Prices

Intelligence for the Global  
Forest Supply Chain

[resourcewise.com](https://resourcewise.com)

Better data. Better intelligence. Better decisions.

In today's dynamic forest products industry, having access to accurate, timely data is crucial for strategic decision-making. WoodMarket Prices is your one-stop platform for global wood price and trade data going back over 25 years, providing the tools and insights you need to thrive in a competitive market.

### YOUR SOURCE FOR COMPREHENSIVE MARKET DATA

WoodMarket Prices offers an extensive repository of price and trade data, coupled with trending market commentary on critical industry developments. As the only source for global price reporting for wood chips, pulp logs, sawlogs, lumber, and wood pellets, our platform ensures you have the information you need for success.

### GLOBAL COVERAGE FOR COMPREHENSIVE INSIGHTS

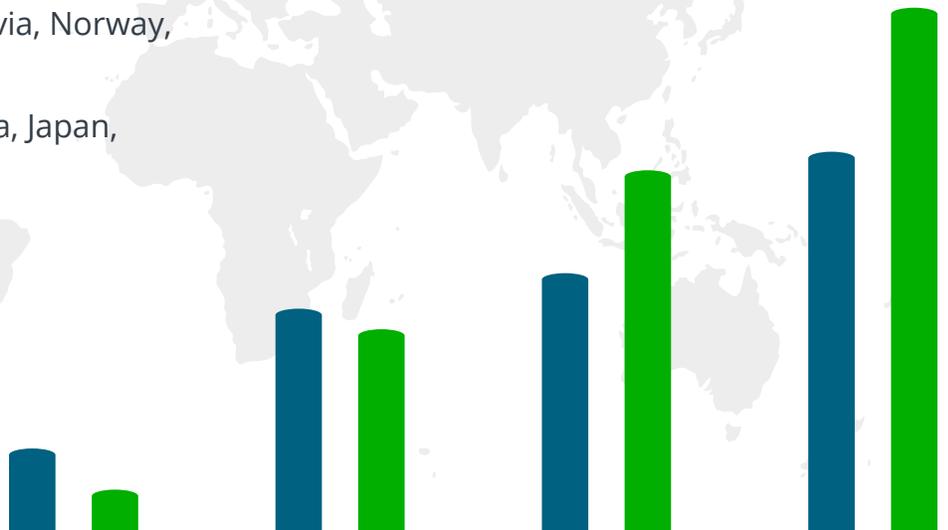

Our unique price indices provide pricing data and market analytics across a broad range of countries and regions, including:

- **North America:** Western and Eastern Canada, US Northwest, and US South
- **South America:** Brazil, Chile
- **Europe:** Austria, Czech Republic, Estonia, Finland, France, Germany, Latvia, Norway, Poland, Spain, Sweden
- **Asia/Oceania:** Australia, China, Japan, New Zealand
- Russia

### SAWLOG AND PULPWOOD PRICE INDICES

Gain visibility into sawlog and pulpwood pricing, essential for understanding the cost structure of softwood lumber and pulp production.

- **Global Sawlog Price Index (GSPI):** Volume-weighted index covering log species used for softwood lumber manufacturing worldwide
- **European Sawlog Price Index (ESPI):** Average prices for the nine largest sawlog-consuming countries in Europe
- **Global Pulpwood Price Indices (SFPI and HFPI):** Softwood and hardwood fiber prices across global regions, critical for evaluating the competitiveness of pulp manufacturing

# Product Features

- **Price Tracking:** Monitor worldwide pricing trends for sawlogs and pulpwood with precision.
- **Global Trade Monitoring:** Access monthly trade information for lumber, logs, wood chips, and wood pellets, with detailed segmentation by country and region for the past 15 years.
- **Industry Developments:** Stay updated with the latest developments across North America, Europe, Latin America, Oceania, and Asia.
- **Historical Global Pricing Data:** View and download thirty years of historical wood raw-material price trends.
- **Currency Customization:** Customize prices in both US dollars and local currencies for greater flexibility.
- **Data Exports:** Easily export data in XLSX, CSV, or PDF formats for seamless analysis and reporting.

## ADVANCED MARKET INTELLIGENCE

WoodMarket Prices equips you with current and historical pricing data, trade visualizations, and global market insights tailored to your needs:

- **Current and Historical Data:** Compare prices by country and analyze long-term trends for sawlogs, pulp logs, wood chips, pellets, market pulp, and lumber.
- **Trade Visualizations:** Our interactive map and trade-flow wheel allow you to segment trade data for sawlogs, lumber, hardwood and softwood chips, market pulp, and pellets by country and region.
- **Global Market Insights:** Benefit from expert commentary on market dynamics for pulpwood, lumber, pulp, sawlogs, and pellets, helping you make informed decisions.

## TAILORED TO MEET YOUR NEEDS

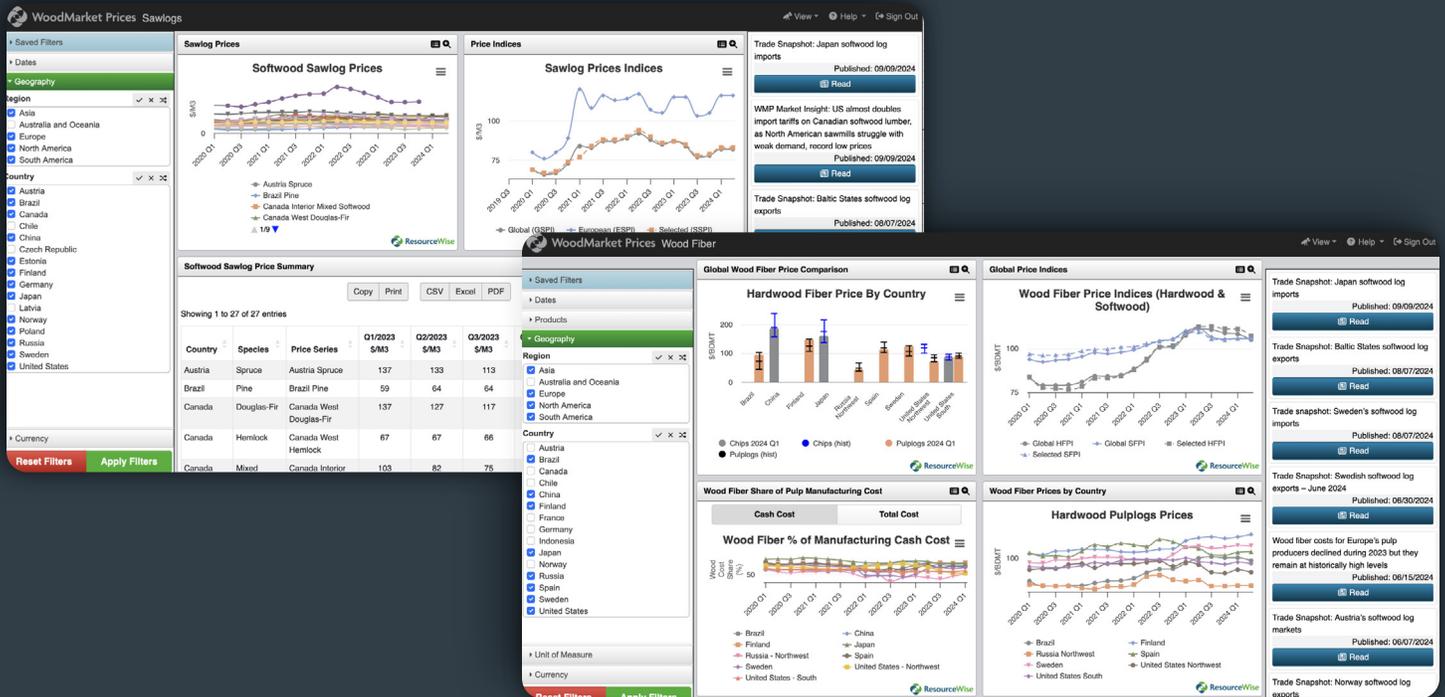

WoodMarket Prices is designed for analysts, procurement professionals, and operational teams who require detailed, accurate data for:

- **Strategic Planning:** Use our data for long-term planning, semi-annual and annual analysis, and to inform investment strategies.
- **Price/Contract Negotiations:** Leverage our comprehensive data and insights for informed price and contract discussions.
- **In-Depth Analysis:** Access detailed data with a time horizon of thirty-five years for pricing and thirteen years for trade data.

# Stay Ahead in the Global Forest Supply Chain

With WoodMarket Prices, you have the tools and data to navigate the complexities of the global forest products market. Whether you're tracking monthly lumber prices, monitoring the global trade of wood chips, or analyzing sawlog costs, our platform supports your strategic success.
